

What are your triggers that may remind you of your family/friends who experienced violence/trauma?

Name three action steps that you will do to prevent secondary trauma.

How would you intervene if you observed yourself or your interpreting partner who is experiencing secondary trauma symptoms?

What could you do when you are experiencing triggers when interpreting without partner(s)?

How can you improve your agency/organization to be supportive and healing when working in stressful or traumatic work?

What challenges do you think you will face related to secondary trauma?
